TECHNICAL SKILLS: Javascript, TypeScript, HTML5, CSS3, SASS, SCSS, React.js, NextJs, Angular, Node.js, Apollo, GraphQL, Sequelize, PostgreSQL, JQuery, Firebase, Heroku, Netlify, AWS (Amplify, CodeCommit), Jest, Enzyme, Git, Travis-CI

EXPERIENCE

MikMak - Software Engineer: January 2021 - Present

- closely Gcloud stuff

Accenture - Web Developer: October 2019 - January 2021

- Worked closely with cross-functional team including BAs, PMs, and QAs, designers, and other developers
- Participated in code reviews, sprint planning, sprint grooming, and other agile development processes
- Built backends using Apollo, GraphQL, Passport (Google OAuth), and Sequelize (PostgreSQL)
- Developed front ends using React, GraphQL, CSS, SCSS, LESS, Jest (for testing), Angular, Typescript, and Next.JS
- Presented progress to clients in bi-weekly sprint reviews

Some Kind of Coffee Co - Front End Developer: May 2019 - September 2019

- Built a 'Coming Soon' page with signup to collect emails and prepare site for launch
- Set up git, GitHub repo, and Trello boards for workflow and organization
- Converted mockups from Sketch to a Shopify site using Theme-Kit, Liquid templating, HTML5, SCSS, and Javascript
- Maintained, updated, and fixed issues after initial site was created

Modulos Design - Front End Developer: January 2018 - April 2019

- Gather and discuss specifications such as layout details and requirements for website and design with clients
- Built designs using Jekyll, HTML5, Javascript, SASS and connected necessary APIs
- Maintain, fix bugs that may appear, and update with new requirements when necessary
- Websites include natalie-rojas.com, hazatv.com, ronspiesspilates.com, and angelvazqr.github.io

Sports Illustrated (Software Developer Intern): June 2017 - August 2017

- Built a script to automate cropping and resizing of images in zip files using Python which reduce time and labor if done by hand: [Repo Link](#)
- Fixed bugs such as styling issues, functionally issues, and updated with redesigns for websites such as si.com, sikids.com, si.com/swimsuit, and golf.com using HTML5, Handlebars, SASS, Coffeescript, and Node.js
- Made a dynamic button that displays the lowest golf course price for a selected area using data pulled from Sports Illustrated API and redirects to a page with more information on that area

PROJECTS

Open Sideways Dictionary: [Repo Link](#) | [Live Link](#)

- Open source project to quickly deploy a [sideways dictionary](#) of any topic.
- Build with Node.js, Apollo GraphQL, ReactJs, SCSS modules, Sequelize, and PostgreSQL and deployed on Heroku

ScoopsAhoy-ChatBot: [Repo Link](#) | [Live Link](#)

- A simple web app that features a bot that responds to certain commands using Twilio API
- Build with Node.js, Express, SASS, HTML5, Socket.io, Javascript, Twilio API, and Foursquare Places API

eBay-Notifier: [Repo Link](#)

- An electron app that scrapes and watches for new items with a set of parameters and notifies for purchase
- Built with React.js, Electron, Node.js, JavaScript, CSS, HTML5

Suggestions: [Repo Link](#) | [Live Link](#)

- An online community board where people can view and post suggestions based on location.
- Built with EJS, JavaScript, SASS, Node.js, PostgreSQL, Mapbox API

EDUCATION: CUNY Lehman College: B.S in Computer Science / Minor: Economics: January 2018

RELEVANT COURSEWORK: Probability, Linear Algebra, Data Structures, Data Science, Video Game Programming, Logic, Database, Operating Systems, Neural Networks
